TECHNICAL SKILLS

- **Languages/Tools:** SQL (PostgreSQL), Power BI, Excel (Pivot Tables, Regression), Github, Python
- **Analytics:** Data Cleaning, Statistical Modeling (OLS), Hypothesis Testing
- **Concepts:** Data Visualization, Trend Analysis, Regression Modeling

PROJECTS

Business Intelligence & Financial Analytics Project

- Built an end-to-end business intelligence solution by importing Excel data into PostgreSQL and developing interactive dashboards in Power BI
- Analyzed profitability across 52 completed jobs, uncovering a 17-point margin gap between the highest- and lowest-performing service lines
- Identified that the company's most frequently booked service generated the lowest profit-per-hour, revealing a mismatch between job volume and profitability
- Built three Power BI dashboards for service-line profitability, supervision impact by crew size, and client concentration to support staffing, pricing, and retention decisions

MLB Offensive Performance Analysis

- Conducted a panel data analysis of all 30 MLB teams (2021–2024) to evaluate the impact of environmental factors on offensive production
- Built multiple OLS regression models in Excel, including baseline and alternative specifications
- Identified and corrected omitted variable bias by introducing temperature as a control variable and applying year fixed effects
- Translated statistical findings into insights on environmental and physiological trade-offs

Baseball Pitch Analytics Web Application

- Developing a data-driven web application to analyze pitch-level performance and whiff rates
- Built using Python backend, SQL database, and React frontend

PROFESSIONAL EXPERIENCE

Financial Analyst Intern

Greenscapes South Jersey LLC – Blackwood, NJ

Jan 2024 – May 2025

- Analyzed company financial data to identify cost-saving opportunities in materials spending
- Conducted material and labor cost analysis across job types to support competitive, margin-conscious pricing on client quotes
- Identified an opportunity to apply data analytics to internal operations, securing buy-in from leadership to access company data for an independent SQL/Power BI project
- Generated new business leads through targeted outreach in local Facebook community groups, contributing to the acquisition of 30 new clients and a 25% revenue increase

Delivery Driver

Carollo's Family Restaurant – Turnersville, NJ

Aug 2021 – Present

Delivered orders and provided consistent customer service while balancing coursework and internship commitments; recognized with multiple Employee of the Month awards

EDUCATION & CERTIFICATIONS

Bachelor of Arts in Economics - Rowan University, Conferred: *December 2025*

Relevant Coursework: Money and Banking, *May 2022*
